<https://doi.org/10.56225/ijgoia.v0i0.00>

1 *Type of the Paper (Article, Review, Communication, etc.)*

2 **Title**

3 **Firstname Lastname¹, Firstname Lastname² and Firstname Lastname^{2,*}**

4 ¹ Affiliation 1 (Department, Faculty, University, Postal code, State, Country); e-mail@mail.com

5 ² Affiliation 2 (Department, Faculty, University, Postal code, State, Country); e-mail@mail.com

6 * Correspondence: e-mail@mail.com ; (optional; if there are multiple corresponding authors, add author
7 initials)

8
9 **Citations:** Lastname, Firstname., Lastname, Firstname., & Lastname, Firstname., (Year). Title. *International
10 Journal of Global Optimization and Its Application*, Vol. (No.), Page-Page. <https://doi.org/10.56225/ijgoia.v0i0.00>

11 **Academic Editor:**

12 Received: 1 November 2021 Accepted: 1 January 2022 Published: 28 June 2022

13 **Abstract:** This section consists of single paragraph and about 250 words maximum. For research articles,
14 abstracts should give a pertinent overview of the work. We strongly encourage authors to use the following
15 style of structured abstracts, but without headings: (1) Background: Place the question addressed in a broad
16 context and highlight the purpose of the study; (2) Methods: briefly describe the main methods or treatments
17 applied; (3) Results: summarize the article's main findings; (4) Conclusions: indicate the main conclusions
18 or interpretations. The abstract should be an objective representation of the article and it must not contain
19 results that are not presented and substantiated in the main text and should not exaggerate the main
20 conclusions.

21 **Keywords:** Keyword 1; Keyword 2; Keyword 3 (List three to ten pertinent keywords specific to the article
22 yet reasonably common within the subject discipline.)

Copyright: © 2022 by the publisher. Submitted for possible open access publication under the terms and conditions of the Creative Commons Attribution (CC BY) license (<https://creativecommons.org/licenses/by/4.0/>).

23 **0. How to Use This Template**

24 The template details the sections that can be used in a manuscript. Note that each section has a
25 corresponding style, which can be found in the "Styles" menu of Word. Sections that are not mandatory are
26 listed as such. The section titles given are for articles. Review papers and other article types have a more
27 flexible structure. Remove this paragraph and start section numbering with 1. For any questions, please
28 contact the editorial office of the journal or editor@srnintellectual.com.

29 **1. Introduction**

30 The introduction should briefly place the study in a broad context and highlight why it is important. It
31 should define the purpose of the work and its significance. The current state of the research field should be
32 carefully reviewed and key publications cited. Please highlight controversial and diverging hypotheses
33 when necessary. Finally, briefly mention the main aim of the work and highlight the principal conclusions.
34 As far as possible, please keep the introduction comprehensible to scientists outside your particular field of
35 research. References should be in APA style and listed in alphabetical order. Please do not include any
36 abbreviations. Any additional references should be included in an Additional Reading section. For more

37 information and examples on properly citing sources in APA style, please see [APA Citation Guidelines](#). See
38 the end of the document for further details on references.

39 **2. Materials and Methods**

40 The Materials and Methods should be described with sufficient details to allow others to replicate and
41 build on the published results. Please note that the publication of your manuscript implicates that you must
42 make all materials, data, computer code, and protocols associated with the publication available to readers.
43 Please disclose at the submission stage any restrictions on the availability of materials or information. New
44 methods and protocols should be described in detail while well-established methods can be briefly described
45 and appropriately cited.

46 Research manuscripts reporting large datasets that are deposited in a publicly available database should
47 specify where the data have been deposited and provide the relevant accession numbers. If the accession
48 numbers have not yet been obtained at the time of submission, please state that they will be provided during
49 review. They must be provided prior to publication. Interventionary studies involving animals or humans,
50 and other studies that require ethical approval, must list the authority that provided approval and the
51 corresponding ethical approval code.

52 **3. Results**

53 This section may be divided by subheadings. It should provide a concise and precise description of the
54 experimental results, their interpretation, as well as the experimental conclusions that can be drawn.

55 **3.1. Subsection**

56 **3.1.1. Subsubsection**

57 Bulleted lists look like this:

- 58 • First bullet;
- 59 • Second bullet;
- 60 • Third bullet.

61 Numbered lists can be added as follows:

- 62 1. First item;
- 63 2. Second item;
- 64 3. Third item.

65 The text continues here.

66 **3.2. Figures, Tables and Schemes**

67 All figures and tables should be cited in the main text as Figure 1, Table 1, etc.

68

69 **Figure 1.** This is a figure. Schemes follow the same formatting.

70

71

72

73 **Table 1.** This is a table. Tables should be placed in the main text near to the first time they are cited.

Title 1	Title 2	Title 3
entry 1	data	data
entry 2	data	data ¹

74 ¹ Tables may have a footer.

75 The text continues here (Figure 2 and Table 2).

(a)

(b)

76 **Figure 2.** This is a figure. Schemes follow another format. If there are multiple panels, they should be listed as (a)
 77 Description of what is contained in the first panel; (b) Description of what is contained in the second panel. Figures
 78 should be placed in the main text near the first time they are cited. A caption on a single line should be centered.

79 The text continues here (Figure 2 and Table 2).

80 **Table 2.** This is a table. Tables should be placed in the main text near the first time they are cited.

Title 1	Title 2	Title 3	Title 4
	data	data	data
entry 1 *	data	data	data
	data	data	data
entry 2	data	data	data
	data	data	data
entry 3	data	data	data
	data	data	data
	data	data	data
entry 4	data	data	data
	data	data	data

81 * Tables may have a footer.

82 3.3. Formatting of Mathematical Components

83 This is example 1 of an equation:

$$a = 1, \tag{1}$$

84 the text following an equation need not be a new paragraph. Please punctuate equations as regular text.

85 This is example 2 of an equation:

$$a = b + c + d + e + f + g + h + i + j + k + l + m + n + o + p + q + r + s + t + u + v \tag{2}$$

86 the text following an equation need not be a new paragraph. Please punctuate equations as regular text.

87 Theorem-type environments (including propositions, lemmas, corollaries etc.) can be formatted as
 88 follows:

89 **Theorem 1.** *Example text of a theorem. Theorems, propositions, lemmas, etc. should be numbered se-*
90 *quentially (i.e., Proposition 2 follows Theorem 1). Examples or Remarks use the same formatting,*
91 *but should be numbered separately, so a document may contain Theorem 1, Remark 1 and Example 1.*

92 The text continues here. Proofs must be formatted as follows:

93 **Proof of Theorem 1.** Text of the proof. Note that the phrase “of Theorem 1” is optional if it is clear which
94 theorem is being referred to. Always finish a proof with the following symbol.

95 The text continues here.

96 4. Discussion

97 Authors should discuss the results and how they can be interpreted from the perspective of previous
98 studies and the working hypotheses. The findings and their implications should be discussed in the broadest
99 context possible. Future research directions may also be highlighted.

100 5. Conclusions

101 This section is mandatory but can be added to the manuscript if the discussion is unusually long or
102 complex and add research limitations and policy implications to the theory and practice.

103 6. Patents

104 This section is not mandatory but may be added if there are patents resulting from the work reported in
105 this manuscript.

106 **Supplementary Materials:** The following supporting information can be downloaded at:
107 www.srn.intellectual.com/xxx/s1, Figure S1: title; Table S1: title; Video S1: title.

108 **Author Contributions:** For research articles with several authors, a short paragraph specifying their individual
109 contributions must be provided. The following statements should be used “Conceptualization, X.X. and Y.Y.;
110 methodology, X.X.; software, X.X.; validation, X.X., Y.Y. and Z.Z.; formal analysis, X.X.; investigation, X.X.;
111 resources, X.X.; data curation, X.X.; writing—original draft preparation, X.X.; writing—review and editing, X.X.;
112 visualization, X.X.; supervision, X.X.; project administration, X.X.; funding acquisition, Y.Y. All authors have read
113 and agreed to the published version of the manuscript.” Please turn to the CRediT taxonomy for the term explanation.
114 Authorship must be limited to those who have contributed substantially to the work reported.

115 **Funding:** Please add: “This research received no external funding” or “This research was funded by NAME OF
116 FUNDER, grant number XXX” and “The APC was funded by XXX”. Check carefully that the details given are
117 accurate and use the standard spelling of funding agency names at <https://search.crossref.org/funding>. Any errors may
118 affect your future funding.

119 **Institutional Review Board Statement:** In this section, you should add the Institutional Review Board Statement and
120 approval number, if relevant to your study. You might choose to exclude this statement if the study did not require
121 ethical approval. Please note that the Editorial Office might ask you for further information. Please add “The study was
122 conducted in accordance with the Declaration of Helsinki, and approved by the Institutional Review Board (or Ethics
123 Committee) of NAME OF INSTITUTE (protocol code XXX and date of approval).” for studies involving humans. OR
124 “The animal study protocol was approved by the Institutional Review Board (or Ethics Committee) of NAME OF
125 INSTITUTE (protocol code XXX and date of approval).” for studies involving animals. OR “Ethical review and
126 approval were waived for this study due to REASON (please provide a detailed justification).” OR “Not applicable”
127 for studies not involving humans or animals.

128 **Informed Consent Statement:** Any research article describing a study involving humans should contain this
129 statement. Please add “Informed consent was obtained from all subjects involved in the study.” OR “Patient consent
130 was waived due to REASON (please provide a detailed justification).” OR “Not applicable.” for studies not involving
131 humans. You might also choose to exclude this statement if the study did not involve humans. Written informed
132 consent for publication must be obtained from participating patients who can be identified (including by the patients
133 themselves). Please state “Written informed consent has been obtained from the patient(s) to publish this paper” if
134 applicable.

135 **Data Availability Statement:** In this section, please provide details regarding where data supporting reported results
136 can be found, including links to publicly archived datasets analyzed or generated during the study. Please refer to

137 suggested Data Availability Statements in section “SRN Research Data Policies” at
138 <https://www.srn.intellectual.com/ethics>. If the study did not report any data, you might add “Not applicable” here.

139 **Acknowledgments:** In this section, you can acknowledge any support given which is not covered by the author
140 contribution or funding sections. This may include administrative and technical support, or donations in kind (e.g.,
141 materials used for experiments).

142 **Conflicts of Interest:** Declare conflicts of interest or state “The authors declare no conflict of interest.” Authors must
143 identify and declare any personal circumstances or interest that may be perceived as inappropriately influencing the
144 representation or interpretation of reported research results. Any role of the funders in the design of the study; in the
145 collection, analyses or interpretation of data; in the writing of the manuscript, or in the decision to publish the results
146 must be declared in this section. If there is no role, please state “The funders had no role in the design of the study; in
147 the collection, analyses, or interpretation of data; in the writing of the manuscript, or in the decision to publish the
148 results”.

149 **Appendix A**

150 The appendix is an optional section that can contain details and data supplemental to the main text—for
151 example, explanations of experimental details that would disrupt the flow of the main text but nonetheless
152 remain crucial to understanding and reproducing the research shown; figures of replicates for experiments
153 of which representative data is shown in the main text can be added here if brief, or as Supplementary data.
154 Mathematical proofs of results not central to the paper can be added as an appendix.

155 **Appendix B**

156 All appendix sections must be cited in the main text. In the appendices, Figures, Tables, etc. should be
157 labeled starting with “A”—e.g., Figure A1, Figure A2, etc.

158 **References**

159 References should be in **APA style and listed in alphabetical order**. Please do not include any abbreviations. Any
160 additional references should be included in an *Additional Reading* section. For more information and examples on
161 properly citing sources in APA style, please see [APA Citation Guidelines](#). It is your responsibility to ensure that all
162 information in your paper that is taken from another source is substantiated with an in-text reference citation. Please
163 also note that your references **must strictly follow APA** (American Psychological Association) style. We recommend
164 preparing the references with a bibliography software package, such as ReferenceManager ([Mendeley](#)) to avoid typing
165 mistakes and duplicated references. Include the digital object identifier (DOI) for all references where available.

166 *NOTE: The publisher may return your chapter to you for correction if you do not properly format your references.*
167 *Note that this will delay the production process, and ultimately, the release of the book.*

168 **Examples:**

169 References should relate only to the material you actually cited within your chapter (this is not a bibliography), and
170 they should be listed in alphabetical order. Please do not include any abbreviations. While some examples of references
171 in APA style are included below, it is highly recommended that you reference an actual APA style manual (7th
172 edition). If you do not own an APA style manual, you may either 1) consult your library or 2) visit APA’s Web site to
173 order your own copy: <http://www.apastyle.org/pubmanual.html>. It may also benefit you to consult the following pages
174 of APA’s Web site for frequently asked questions and other tips: <http://www.apastyle.org/faqs.html> &
175 <http://www.apastyle.org/previoustips.html>.

176 **Book with one author:**

177 Author, A. A. (2005). *Title of work*. Publisher.

178 **Book with two authors:**

179 Author, A. A., & Author, B. B. (2005). *Title of work*. Publisher.

180 **Book with more than two authors:**

181 Author, A. A., Author, B. B., & Author, C. C. (2005). *Title of work*. Publisher.

182 **Journal article:**

183 Sawyer, S., & Tapia, A. (2005). The sociotechnical nature of mobile computing work: Evidence from a study of
184 policing in the United States. *International Journal of Technology and Human Interaction*, 1(3), 1-14.

185 **A publication in press:**

186 Junho, S. (in press). Roadmap for e-commerce standardization in Korea. *International Journal of IT Standards and
187 Standardization Research*.

188 **A publication in a language other than English:**
